DESCRIPTION

I am a developer with 6 years of experience in PHP development. I have been involved in creating websites, from design to maintenance, adhering to coding standards and best practices. I am currently expanding my skills to include Python. I am motivated to stay up-to-date with the latest web technologies.

My goal is to make a meaningful contribution to innovative projects by applying my technical skills and passion for programming. I am also the holder of a work visa for Canada, allowing me to work legally in the country.

WORK EXPERIENCE

Software developer **Maplr**
(Temporary position) *Montreal*
2023 - 2023 Technologies used: Windows 2010, Sql Server.

Web Developer **Collector Square**
(Permanent position) *Paris*
2020 - ACTUEL E-commerce website for purchasing second-hand luxury products.

- Website redesign following the UX/UI team's mockups.
- Client appointment booking management.
- Authentication system (Google and Apple).
- Automatic translations.
- Integration of email marketing system (Mailchimp then Sarbacane).
- Implementation of new features to enhance the website.

Technologies used: PHP (Symfony 3-4), Javascript (jQuery), CSS (Sass), HTML, MacOS, Elasticsearch, Redis.

Web Developer **XXII**
(Permanent position) *Suresnes*
2019 - 2020 My work involved developing web APIs that retrieve data from a Python backend using the JSON data format.

- Created a web application that tracks the number of events (people, vehicles, etc.) entering and exiting a highway rest area.
- Developed a web application for ADP (Aéroports de Paris) that listed the various stages of an aircraft's arrival and departure. The events included displaying a progress bar when the plane landed, when it was stationary, when passengers disembarked, and when it was refueled, among others.

Technologies used: Linux, PHP (Symfony 4), JavaScript (ReactJs), HTML, CSS, API Platform, Docker.

Web Developer
(Permanent position)
2018 - 2019

Expandi Group
Paris
Marketing Agency

- Modified existing code to make the website 'Multi-Country,' which means displaying currencies, leads, and sales based on the user's country, but visible only to 'Super Admins.'
- Implemented GDPR (General Data Protection Regulation) compliance.
- Created showcase websites.
- Maintained multiple live websites.

Technologies used: Linux, PHP (Symfony 3/4), CSS, JavaScript (Jquery), HTML, REST API, GitLab, Redmine.

Web Developer
(Temporary position)
2017 - 2017

Numerique 1
Massy

My work involved creating new features for a web application targeted at businesses, including the development of an administration panel, survey creation, retrieving Outlook and Gmail emails through APIs, and creating fixtures.

Technologies used: REST API, PHP (Symfony 3), JavaScript (Angular), CSS, HTML, Linux.

Web Developer
(Internship)
2017 - 2017

Orchid Création
Paris

Designed a web application built from an Excel file.

The file was used to calculate the working hours for each employee and the revenues for each project.

Technologies used: PHP (Symfony 3), JavaScript (jQuery), Css (Sass), Html, Linux.

EDUCATION

IT Designer Developer
(high school diploma)
2016 - 2017

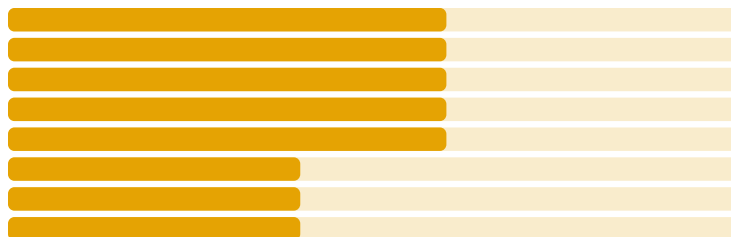

M2I Formation
Paris

I learned the fundamentals of web development with JavaScript and algorithms.

Afterwards, I honed my skills in the backend realm with PHP and database design.

SKILLS

PHP
Symfony
TailwindCss
JavaScript
Linux / MacOS
ReactJs
Elasticsearch
Python (Recently learning)
